Whether it's delivering time critical medical devices or organizing and controlling the logistics of device manufacturing from start to finish, JSI provides the services you need. As one of the leading privately owned logistics and supply chain management service providers, JSI focuses on providing secure, innovative and time sensitive solutions for our customers. With a direct global presence and thousands of team members throughout the world, JSI strives to provide top tier performance with unprecedented operational excellence. Imperative needs for careful handling, secure shipping, advanced technology, and in some cases life and death critical delivery times, sets the healthcare industry apart from all others. JSI offers specific services to meet these unique needs.
