

TECHNOLOGY Driven Results

IT & WMS

For more info, visit our website:
www.jsilogistics.com

Seamless supply chain management is only possible with the most advanced technology systems in place. By focusing on a user friendly interface, JSI's IT and WMS solutions allow access to information you need instantaneously with the click of a mouse. Utilizing our global network of experienced professionals and innovative technology, we ensure an organized, tightly controlled process using our solutions. Specific features of our convenient IT solutions include: *order placement*, both done live in our WMS via web portal or by automated data transfer from our customer's ERP system to our WMS; *order tracking*, with visibility throughout our warehouse processes; and *inventory management*, showing current product quantities stocked in our warehouse. Our IT and WMS Solutions integrate a secured environment with individually managed credentials to ensure high levels of security. Additionally, JSI's IT and WMS solutions are capable of generating customer specific documents and reports, giving you further organization and control.
